### **High Throughput Chemistry and New Technologies Group**

<http://www.rsc.org/lap/rsccom/dab/perk008.htm>

The High Throughput Chemistry and New Technologies Group was established in 2000 to create a forum in which chemists and technologists could interact to advance high throughput chemistry and its applications. This has been achieved primarily by the hosting of scientific conferences and by exploiting the resulting networking opportunities. Since the group's launch at a mini symposium at the RSC Annual Conference in 2001, the group has organised conferences covering high throughput and related technological aspects of medicinal chemistry, materials science, catalysis and analytical chemistry.
